

RAYCON

## OUR STORY

What do you get when you mix platinum selling artists, tastemakers and tech nerds who are tired of spending too much on high quality audio products? You get Raycon. A company founded to show the world that premium sound can be affordable.

We're not big tech. However, we're making a giant impact by designing products that put people first. They've got the sound you want, the comfort you need and the price you can handle. We are Raycon, and this is the end of audio as you know it.

## WHAT SETS US APART

We're an audio company that listens. You are placed right at the center of our design process. That way we can deliver everything you want at a price you can swing. We stand by our work, but we want you to be satisfied, hence the 365-day warranty and our excellent customer support.
